Docket 50-57  
License R-77

U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, D.C. 20555-0001

**Subject: Final Status Survey Report and Request for License Termination of Possession-Only License R-77 at the Buffalo Materials Research Center.**

Dear Sir or Madam:

Please find enclosed the Final Status Survey Report for the Buffalo Materials Research Center (BMRC) at the State University of New York at Buffalo. We are in receipt of the final NRC Inspection Report (No. 05000057/2015001) and the ORAU Confirmatory Inspection report (Final Report – Confirmatory Survey Activities Associated with Phase 2 for the Buffalo Materials Research Center at the State University of New York at Buffalo) both dated January 6, 2016.

Our contractor, Enercon Services, has performed sampling, evaluation, and analysis of the resultant data. Based upon these activities and data (provided in the enclosures) we have demonstrated that the BMRC site meets the radiological criteria for license termination. We therefore request the termination of this License R-77.

If you have any questions or wish further information, please contact me at (716) 829-3301 or through e-mail at [dvasbind@buffalo.edu](mailto:dvasbind@buffalo.edu).

Sincerely,

David R. Vasbinder  
Director, Buffalo Materials Research Center
