SUBJECT: H.B. ROBINSON STEAM ELECTRIC PLANT – NOTICE OF VIOLATION; NRC
INSPECTION REPORT NO. 05000261/2017405; AND INVESTIGATION
REPORT NO. 2-2016-001

Dear Mr. Kapopoulos:

This refers to an investigation completed on September 30, 2016, by the Nuclear Regulatory Commission's (NRC) Office of Investigations (OI) concerning activities at Duke Energy's H. B. Robinson Steam Electric Plant (Robinson). The purpose of the investigation was to review a security incident that was identified on September 23, 2015. The results of the investigation, including the identification of an apparent violation, were described in NRC Inspection Report (IR) 05000261/2016404 dated December 27, 2016.

In the letter transmitting the inspection report, we provided you with the opportunity to address the apparent violation identified in the report by either attending a pre-decisional enforcement conference or by providing a written response before we made our final enforcement decision. In a letter dated January 24, 2017, you provided a response to the apparent violation.

As documented in your written response, you accepted the violation and facts as described in the inspection report, acknowledged the significance of the issue and the need for lasting and effective corrective actions, and provided details of your corrective actions to preclude recurrence.

Based on the information developed during the investigation and the information provided in your written response, the NRC has determined that a violation of NRC requirements occurred. The violation is cited in the enclosed Notice of Violation (Notice, Enclosure 1), and the circumstances surrounding it are described in detail in the subject NRC Inspection Report. Enclosure 2 to this letter describes the basis for determining the severity level of the violation and the basis for the NRC's conclusion that a civil penalty is not warranted.

~~Enclosure(s) transmitted herewith contain(s) SUNSI. When separated from enclosure(s), this transmittal document is decontrolled.~~
