Dear Mr. Fowler:

By letter dated December 23, 2016, you submitted an application for amendment of Certificate of Compliance No. 9225, for the Model No. NAC-LWT transport package. The application proposes adding damaged NRX and NRU fuel as authorized contents. This letter acknowledges receipt of your application and informs you that the application appears to contain the necessary information to begin our technical review.

We have established a schedule for the review. The schedule allows for the staff to complete its technical review and issue the first request for additional information by March 31, 2017, and, if a second request for additional information is not needed, a certificate of compliance in early June 2017, based on you responding to the first request for additional information by the end of April 2017. If a request for additional information is not needed, the NRC will issue a certificate of compliance by mid-April 2017. In order to maintain this schedule, no additional changes to the application should be submitted except for changes resulting from your response to a request for additional information.
