**Attachments:** U Mich Disposal Letter jan19-2017.pdf

Bryan:

Here is the letter from Thermo Fisher. You had requested this for our NRC License Amendment (Control # 592305).

Please let me know if you require any additional information.

Thank you for your help.

We look forward to receiving our License amendment to receive a new DT neutron generator.

Take care!

Joe

**Subject: Disposal of Neutron Tube for D-711 Neutron Generators**

Dear Dr. Miklos,

We manufactured a Model A-3045 DT neutron tube for the University's D 711 neutron generator on 11/22/2006, serial number 442. That tube was shipped to the University on 05/07/2007 and received back by us on 05/04/2015.

This past fall, tube #442 was among the tubes we prepared for a waste disposal shipment. That tube was picked up from our building by our waste broker in a Class-B drum on 09/12/2016 and was accepted for disposal at US Ecology on 12/19/2016.
