Hi Sabrina:

Thank-you for your letter dated 2017 January 25, regarding the NRC Re-evaluation of Category 3 Source Security and Accountability. I appreciate the fact that NRC is interested in the opinions of ISSPA and that we continue to stay integrated on such important matters. To put a reference in time to my name, we met at the IMRP meeting in Vancouver where you provided a presentation at the WINS Workshop.

This Category 3 source re-evaluation is an important matter to ISSPA, and one that affects many of its members. We have had initial discussions within the Association and will be having further review at our upcoming Annual General Meeting next week. We were present at the DC public meeting and plan also to participate in the upcoming Boston and Houston meetings. In addition, ISSPA is a Steering Committee member of the Source Security Working Group (SSWG), and at our meeting on February 3, this matter was discussed and SSWG will also be providing comment to NRC.

Please be assured that ISSPA will be submitting comments by the requested date and we would also be open to having discussions with you or staff regarding those comments and the practical impact on the industry. Thanks again for the opportunity and specific notification.

Sincerely,

Paul Gray  
Chairman, ISSPA
