DRWS. to Reg. File

1. The first step in the process of the development of a new product is the identification of a market need. This is often done through market research, which can be conducted in a number of ways, including surveys, focus groups, and interviews. The next step is to develop a concept for the product, which involves creating a detailed description of the product and its features. This is followed by the development of a prototype, which is a physical model of the product that can be used to test the concept and gather feedback. The final step is the development of a business plan, which outlines the financial and marketing aspects of the product and provides a roadmap for the company's future growth.

Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Schwencer:

We are forwarding to you six copies of the Flood Insurance Study and six sets of Flood Insurance Rate maps.

These items were requested by your reviewers during their site visit on August 2nd and 3rd.

Very truly yours,

C. V. Mangan

C. V. Mangan
