Renewed Facility Operating License No. DPR-18  
NRC Docket No. 50-244

Subject: Submittal of Integrated Initial License Examination Materials

Enclosed are the examination materials, which R.E. Ginna is submitting in support of the initial license exam scheduled for the weeks of March 13 and 20, 2017, at Ginna Station.

This submittal includes the Senior Reactor Operator and Reactor Operator Written Examinations, Job Performance Measures, and Integrated Plant Operation Scenario Guides.

These examination materials have been developed in accordance with NUREG-1021, "Operator Licensing Examination Standards for Power Reactors", Revision 10. Please note that reference materials are attached to each individual examination question or item.

Some minor modifications have been made to the Integrated Examination Outline with regards to the operational scenarios in order to improve balance and content. These changes improve examination quality and are in compliance with NUREG-1021, "Operator Licensing Examination Standards for Power Reactors", Revision 10.

Some modifications or adjustments to the examination material may be required due to procedural changes.

In accordance with NUREG-1021, Revision 10, Section ES-201, "Initial Operator Licensing Examination Process", please ensure that these materials are withheld from public disclosure for 2 years after the examinations are complete.

Should you have any questions concerning this letter, please contact Thomas Harding, Manager Site Regulatory Assurance, at (315)791-5219. For questions concerning examination materials, please contact David Eckert, Exam Author, at (315)791-5523.

Respectfully,

A handwritten signature in black ink, appearing to read "JP 3 R", written over the printed name "Joseph E. Pacher".

Joseph E. Pacher

## 2017 ILT NRC Exam Outline Generation Methodology

The following method was used to generate the INITIAL outline submitted to the NRC for this exam:

- A. NUREG-1122, unsuppressed K/A statements and the list of Rejected K/As from the 2014 ILT NRC Exam were reviewed for possible addition/removal to the Suppressed K/A listing.
- B. The Suppressed K/As sent to the Chief Examiner (Dave Silk) on 05/11/2016 were suppressed in the NKEG software program database.
- C. The Westinghouse NRC KA Exam Generator software program (NKEG), Version 1.1, is loaded on the stand-alone exam development computer. This software application provides a means of accessing Revision 2 versions of NUREG-1122, Knowledge and Abilities Catalog for Nuclear Power Plant Operators. A random exam outline was generated on 08/05/2016 for the RO and SRO sections of the ILT Exam.
- D. The random outline from NKEG was manually inputted into an Excel spreadsheet that verifies ES-401-2 requirements are met. No issues were noted.
- E. On 11/22/2016, discussed with the Chief Examiner (Dave Silk) rejecting K/A 039 2.2.39 due to no Technical Specification Action Statements less than or equal to one hour exist for the Main Steam system. A replacement K/A for System 039 was selected by determining the number of remaining K/As and randomly selecting a numbered chip.
- F. On 12/5/2016, the replacement K/A was manually inputted into an Excel spreadsheet that verifies ES-401-2 requirements are met. No issues were noted.

This was the method I used to generate the random outline used to develop the ILT NRC Exam.
