### CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 Probable cause-foreign matter lodged in solenoid operated 4 way valve thereby pre-

1 1 venting proper bleed off. Subsequent testing and external inspection revealed no

1 2 abnormalities. With exception to the initial valve operation all subsequent operations

1 3 were well within the specified times setforth in the Tech. Specs. Because of the

1 4 singular nature of the event no further actions are deemed necessary.
