1. The first group of people who are likely to be affected by the proposed changes are those who are currently employed in the public sector. This group includes a wide range of individuals, from those who are employed in the public sector to those who are employed in the private sector. The proposed changes are likely to have a significant impact on the public sector, as it is the largest employer in the economy. The public sector is likely to be affected in a number of ways, including a reduction in the number of employees, a reduction in the number of hours worked, and a reduction in the number of jobs available. The public sector is also likely to be affected in a number of other ways, including a reduction in the number of jobs available, a reduction in the number of hours worked, and a reduction in the number of jobs available.

L-84-59

Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit No. 2  
Docket No. 50-389  
Proposed License Amendment  
Snubber Visual Inspection

Florida Power & Light Company letter L-84-45, dated February 24, 1984, requested a license amendment to postpone the initial visual inspection of two safety-related mechanical snubbers on the containment spray system until the first refueling outage.

As stated in letter L-84-45, the initial visual inspection has been completed with the exception of the two snubbers identified above, which are inaccessible and require a cold shutdown in order to inspect them.

The next planned cold shutdown is the refueling outage scheduled for October of this year, and therefore, the reason for the postponement.

The current technical specifications require that the initial visual inspection of all safety-related snubbers be performed between four and ten months after commencing POWER OPERATION. POWER OPERATION was begun on June 13, 1983, which means that the initial visual inspection of all safety-related snubbers must be completed by April 13, 1984. Therefore, NRC approval of the proposed license amendment is requested prior to April 13, 1984.

Also, in accordance with 10 CFR 50.91 (b)(1) a copy of the proposed amendment is being forwarded to the State Designee for the State of Florida.

Very truly yours,

*J. W. Williams, Jr.*
