REGULATORY DOCKET FILE COPY

Subject: Ginna Nuclear Power Plant
Environmental Technical Specifications

Dear Mr. Scaletti:

Enclosed herewith is the information on the Ginna Nuclear Power Plant that you requested during our telephone conversation of June 20, 1979:

Enclosure (1) NPDES Permit No. NY 000 0493

This permit incorporates revised pages reflecting settlement of adjudicatory hearing issues. The stipulation which served as the basis for settlement of these issues is also attached.

Enclosure (2) A 316(a) Demonstration Supplement was submitted to the EPA under cover of the enclosed letter dated April 1, 1977. EPA has taken no action to date on this submission.

Enclosure (3) Ginna Section 401 Certification

The company has complied with all conditions of this certification. With regard to item (3)1, requirements for compliance with paragraph 2 have been further defined under condition 10(b) of the Ginna NPDES permit. Together with the enclosed letter dated November 30, 1977 to the DEC and EPA from R. W. Kober, the company submitted the required study and recommended no modification of the existing intake system. No response has been received to date from the agencies.

If I can be of further assistance please call me at telephone number 716-546-2700, extension 2654.

Very truly yours,

Robert J. DeSeyn
Manager, Environmental Engineering
