Re: Fire Protection at R. E. Ginna
Nuclear Power Plant
Docket No. 50-244

Dear Mr. Ziemann:

Item 3.1.20 in the Fire Protection Safety Evaluation Report dated February 14, 1979 requires that the service water piping serving the A diesel generator that passes through the B diesel generator room be protected against the fire hazards in the B diesel generator room to assure adequate service water cooling for the A diesel generator. The target date for completion of this item was September 1979.

Delivery of the insulation material to complete this item has been delayed forcing us to extend the completion date to January 1, 1980.

Very truly yours,

L. D. White, Jr.
