Dear Ms. Blide:

Thank you for your correspondence concerning the Ginna Plant as related to the accident at Three Mile Island Nuclear Station, Unit 2.

I regret that this reponse has been delayed. The accident and its consequences have created a substantial increase in the agency's workload, which has prevented us from responding to you as promptly as we would have wished.

NRC appreciates your concerns about nuclear power and we hope that the enclosed document will provide you with additional information concerning the effects of the Three Mile Island accident on the safety considerations at other nuclear power plants. Each of the plants is being reviewed against the requirements of this document.

Sincerely,
signed by
E. G. Case

Harold R. Denton, Director
Office of Nuclear Reactor Regulation

Dear Sir:

In light of the events of the
past weekend I feel it is
important to keep the Sunn
plant here closed until all
safety systems are renewed
and until a review of the
3 Mile Island accident is
completed.

Sincerely,
Laurie Blide
