Subject: Ginna Piping Seismic Analysis  
R.E. Ginna Nuclear Power Plant  
Docket No. 50-244

Dear Mr. Crutchfield:

We are in receipt of your April 29, 1980 letter regarding Ginna piping seismic analysis. The schedule for our seismic upgrade program has been reviewed to determine when the information you requested will be available for use on the Systematic Evaluation Program. The Design Criteria, including the specific items listed in your letter, will be submitted by July 15, 1980. The stress analysis reports for the A-RHR and B-Main Steam lines inside containment will be submitted by September 15, 1980. The stress analyses for the CVCS and sample field run piping are scheduled for completion in June 1981. Based on this schedule, the reports for these lines could be submitted by July 15, 1981. The schedule for completion of potential modifications for the seismic upgrade program will be based on the results of the analyses.

Sincerely yours,

L.D. White, Jr.
