September 5, 1980

Director of Nuclear Reactor Regulation
Attention: Mr. Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Technical Specifications for TMI-1
Lessons Learned Requirements
R.E. Ginna Nuclear Power Plant
Docket 50-244

Dear Mr. Crutchfield;

Darrel Eisenhut's letter dated July 2, 1980 forwarded model Technical Specifications prepared to cover implementation of TMI Lessons Learned Category A items. The letter requested that we submit a license amendment application to incorporate the model Technical Specification guidance within 60 days. We have reviewed the model specifications and drafted Technical Specifications specific to Ginna Station. The Nuclear Safety Audit and Review Board (NSARB), however, which must review Technical Specification changes, will not meet again until mid October. Thus, our response to Mr. Eisenhut's letter will not be completed for submittal to the NRC Staff until late October, 1980.

Sincerely yours,

L.D. White, Jr.

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. Once the problem is identified, the next step is to define the objectives and goals of the project. This helps to clarify what needs to be achieved and provides a clear direction for the team.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable tasks and determining the resources needed to complete them.

4. The fourth step is to implement the plan. This involves putting the strategy into action and monitoring progress regularly to ensure that the project is on track.

5. Finally, the fifth step is to evaluate the results of the project. This involves assessing the outcomes against the objectives and goals to determine the effectiveness of the intervention.
