Subject: Ginna Piping Seismic Analysis  
R.E. Ginna Nuclear Power Plant  
Docket No. 50-244

Dear Mr. Crutchfield:

In accordance with our letter dated May 30, 1980, enclosed are three copies of stress reports for the A Residual Heat Removal (RHR) piping inside containment and the B Main Steam (MS) piping inside containment. The analyses are a part of our Seismic Upgrade Program and incorporate several proposed piping system modifications. As such, the analyses do not represent the current as-built configuration of the plant. Further, the analyses are subject to revision.

Very truly yours,

L.D. White, Jr.
