

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

In the Matter of

Rochester Gas and Electric Corporation
(R. E. Ginna Nuclear Power Plant,
Unit No. 1)

Docket No. 50-244

95 Sept 80

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Provisional Operating License No. DPR-18, hereby requests that the Technical Specifications set forth in Appendix A to that license be amended to add requirements for undervoltage protection. This request for a change in the Technical Specifications revises and supersedes our request of July 31, 1979, and is submitted in response to a letter from A. Schwencer, Chief, Operating Reactors Branch #1, dated June 3, 1977.

The proposed technical specification change is set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation also demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility. Attachment C describes why no fee under 10 CFR 170.22 is required.
