

UNITED STATES OF AMERICA  
NUCLEAR REGULATORY COMMISSION

In the Matter of )

Rochester Gas and Electric Corporation )  
(R. E. Ginna Nuclear Power Plant, )  
Unit No. 1) )

Docket No. 50-244

APPLICATION FOR AMENDMENT  
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Provisional Operating License No. DPR-18, hereby requests that Sections 3.1, 3.8, 4.3 and 4.11 be revised in the Technical Specifications set fourth in Appendix A to that license. This request for a change in Technical Specifications is submitted in response to a letter dated June 11, 1980 from Mr. Darrell G. Eisenhut, Director, Division of Licensing regarding reactor decay heat removal capability and in response to a letter dated August 15, 1980 from Mr. T. M. Novak, Assistant Director for Operating Reactors regarding refueling conditions.

The proposed technical specification change is set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation also demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility. The proposed changes have been clearly identified as an NRC position in the referenced letters. Therefore, this change is a Class III amendment in accordance with 10 C.F.R. Section 170.22. A check for four thousand dollars (\$4,000.00) is enclosed.

WHEREFORE, Applicant respectfully requests that Appendix A to Provisional Operating License No. DPR-18 be amended in the form attached here to as Attachment A.

Rochester Gas and Electric Corporation
