Attachment To Close-out of September 8, 1988 Unusual Event

On September 8, 1988 at approximately 2158 EDST with the reactor at 100 percent power, the Ginna Station Security Shift Supervisor received a call from the Wayne County Sheriff's Department informing him of a bomb threat to the station. The original threat was received by the Monroe County Sheriff and the Rochester Police Departments. While in the process of investigating the threat they relayed the information to the Wayne County Sheriff Department. The Security Shift Supervisor took immediate compensatory actions per Ginna Station Security procedures.

At approximately 2200 EDST the Security Shift Supervisor notified the Operations Shift Supervisor and the Supervisor of Nuclear Security.

At approximately 2202 EDST, the Operations Shift Supervisor declared an Unusual Event in accordance with SC-100, "Ginna Station Event Evaluation and Classification", EAL: Security; Security threat reported by Security Shift Supervisor. All offsite notifications were made per SC-601, "Unusual Event Notifications".

As the security threat did not materialize, the Operations Shift Supervisor with approval and concurrence from the Superintendent of Ginna Station, the Operations Manager and the Duty Engineer, declared the Unusual Event terminated at 0022 EDST September 9, 1988 in accordance with SC-110, "Ginna Station Event Evaluation for Reducing the Classification". The rationale involved in the termination was:

- After a careful evaluation of the event by the plant management and corporate security, based on information received from the Rochester Police Department on their investigation, the bomb threat was deemed not credible.

Security compensatory actions were also secured at 0022 EDST September 9, 1988.
