)

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

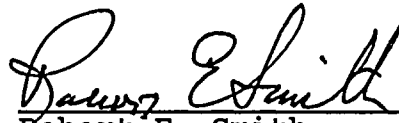

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Facility Operating License No. DPR-28, hereby requests that the Technical Specifications set forth in Appendix A to that license be amended. This request for change in Technical Specifications is submitted to incorporate changes to the Action Statements for the motor driven and turbine-driven auxiliary feedwater pumps and a change to the testing requirements for the turbine-driven auxiliary feedwater pump.

The proposed Technical Specification change is set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation also demonstrates that the proposed changes do not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility. As demonstrated in Attachment B, the proposed change does not involve a significant hazards consideration.

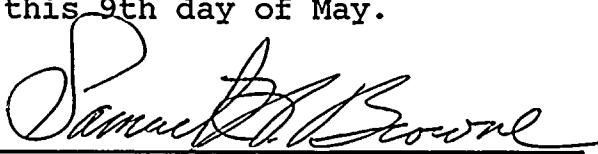

WHEREFORE, Applicant respectfully requests that Appendix A to Facility Operating License No. DPR-18 be amended in the form attached hereto as Attachment A.
