Subject: Certification of Licensed Operator Regualification
Training Program.
R.E. Ginna Nuclear Power Plant
Operating License No. DPR-18
Docket No. 50-244

Dear Sir:

RG&E certifies that the R.E. Ginna Licensed Operator Re-qualification Training Program has been developed using a systematic approach to training. This program was accredited in conjunction with the Initial Licensed Program by the National Nuclear Accrediting Board in February, 1987. This certification is made in accordance with the requirements of 10 CFR 55.59(c).

Should you have any questions, please contact Mr. Robert Carroll, Ginna Training Manager at (315) 524-4446, ext. 328.

Very truly yours,

Robert C. Meckedy
General Manager
Nuclear Production

February 28, 2000

Dr. Robert C. Mecredy
Vice President, Nuclear Operations
Rochester Gas and Electric
89 East Avenue
Rochester, NY 14649

SUBJECT: SENIOR REACTOR AND REACTOR OPERATOR INITIAL EXAMINATIONS -
R. E. GINNA

Dear Dr. Mecredy:

In a telephone conversation on February 24, 2000, between Mr. Joseph D'Antonio, Examiner/Inspector, and Mr. Ken Masker, Senior Instructor, arrangements were made for the administration of licensing examinations at R. E. Ginna, during the week of May 8, 2000.

As agreed during the telephone conversation, your staff will prepare the examinations based on the guidelines in Revision 8, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

To meet the above schedule, it will be necessary for your staff to furnish the written examinations, operating tests, and the supporting reference materials identified in Attachment 2 of ES-201 by March 27, 2000. Pursuant to 10 CFR 55.40(b)(3), an authorized representative of the facility licensee shall approve the outlines, examinations and tests before they are submitted to the NRC for review and approval. All materials should be complete and ready-to-use. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first

T.M.H.

Dr. Robert C. Mecredy

-2-

examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0101, which expires on September 30, 2000.

The public reporting burden for this collection of information is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examinations, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by Internet electronic mail at BJS1@NRC.GOV; and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0101), Office of Management and Budget, Washington, DC 20503.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Thank you for your cooperation in this matter. Mr. Masker has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact J. D'Antonio at (610) 337-5085, or me at (610) 337-5183.

Sincerely,

/RA/
