PWR Project Directorate No. 1
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Anticipated Transients Without Scram
R. E. Ginna Nuclear Power Plant
Docket No. 50-244

Ref: September 22, 1986 letter from D. DiIanni (NRC) to
R. Kober (RG&E)

Dear Mr. Lear:

In my letter to John Zwolinski dated October 11, 1985, I indicated that it was the intention of RG&E to install an ATWS system during the 1988 refueling outage. This was based on receiving your approval of WCAP 10858, "AMSAC Generic Design Package", at the end of 1985 rather than in September of 1986. Because of the extensive design and procurement work associated with this project and the detailed information required by your office, it is prudent to extend our implementation schedule.

RG&E plans to install an ATWS mitigating system at Ginna Station, designed in accordance with the requirements described in the Safety Evaluation of Topical Report (WCAP-10858) "AMSAC Generic Design Package", during the 1989 refueling outage. Our schedule calls for completion of the preliminary design in March 1987 and completion of the final detailed design package in March 1988.

The nature of the plant specific information requested in the SER will require full review and documentation of the final detailed design. RG&E therefore will prepare preliminary responses to these requests for information in August 1987 and prepare final responses during the detailed design phase of the project and submit this information to you in March 1988.

Very truly yours,

Bruce Snow
for
Roger W. Kober
