Director of Nuclear Reactor Regulation
Attention: Mr. George E. Lear, Chief
PWR Project Directorate No. 1
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Revised Schedule for Upper Plenum Injection Task
R. E. Ginna Nuclear Power Plant
Docket No. 50-244

Reference: Letter to the Attention of J.A. Zwolinski, USNRC
from R.W. Kober of RG&E, dated April 18, 1985.

Dear Mr. Lear:

As a result of our meeting with the NRC staff on August 5, 1986, and a subsequent telephone conversation on August 14, Rochester Gas and Electric Corporation with our vendor, Combustion Engineering, will be adding significant additional material to our Upper Plenum Injection (UPI) topical report describing the generic methodology for UPI analyses. The additional material which will be included in the final report will compare all applicable Cylindrical Core Test Facility (CCTF) results plus additional FLECHT results to facilitate affirmation of the applicability of our models to the analysis of plants with UPI. Inclusion of these comparisons will extend work on the preparation of the topical report by approximately three months. However, based on conversations with the NRC staff, we understand that, if we submit draft material of that portion of the topical report which describes the Combustion Engineering Upper Plenum Refill/Reflood (CEUPR) computer code by January 31, 1987, the NRC schedule for completion of the review of the generic methodology by January 1988 will not be impacted. The complete topical report will be submitted by March 31, 1987.

1/0

We and our contractor, Combustion Engineering, will plan to meet with the NRC staff at a mutually convenient date in early December to discuss the approach we are using to satisfy the requirements of SECY-83-472.

Please inform us if these schedules are not acceptable.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Roger W. Kober". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
