Attn: Mr. Carl Stahle
PWR Project Director No. 1
Washington, D.C. 20555
SUBJECT: Submittal of Quality Assurance Program
R.E. Ginna Nuclear Power Plant
Docket Number 50-244

Dear Mr. Stahle:

Revision 13 of subject document was submitted for regulatory review on December 23, 1987. The review identified need for further clarification of the changes submitted on pages 5 and 53. The Superintendent, Nuclear Production has been reinserted on page 5 as sharing responsibility with the Superintendent Ginna Station for the proper implementation of the quality assurance program requirements at Ginna Station. The Ginna Station Organization on page 53 has been revised to indicate the Control Room Foreman position to be the second SRO on shift required when the RCS Average Temperature is greater than 200°F.

The corrected pages, enclosed herein, are to be inserted into the revision 13 submittal.

Very truly yours,

Bruce A. Snow
Superintendent,
Nuclear Production
