1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud.

2. The second part of the document outlines the specific procedures for recording transactions. It details the steps involved in the accounting process, from the initial entry of data into the system to the final review and approval of the records.

3. The third part of the document addresses the challenges associated with maintaining accurate records. It identifies common sources of error and provides strategies for minimizing these errors, such as implementing strict controls and regular audits.

4. The fourth part of the document discusses the role of technology in improving record-keeping. It highlights the benefits of using automated systems to process transactions and generate reports, while also noting the need for proper training and oversight to ensure the reliability of the technology.

5. The fifth part of the document concludes by emphasizing the ongoing nature of the record-keeping process. It stresses that records must be regularly updated and reviewed to remain accurate and useful, and that a commitment to transparency and accountability is essential for the success of the system.

Subject: Containment Spray Pumps  
Withdrawal of Amendment Request  
R.E. Ginna Nuclear Power Plant  
Docket No. 50-244

Dear Mr. Stahle:

Rochester Gas & Electric submitted an Application for Amendment dated January 20, 1988 which, if approved, would revise the operability requirements for the containment spray pumps during safeguards testing. RG&E has now developed a method for performing the required testing which does not depend upon the Amendment request. Therefore, RG&E withdraws the Application and requests that NRC review of the Amendment request be closed out with no action.

Very truly yours,

*Bruce A. Snow*
