Subject: Technical Specification Testing Requirements  
for Snubbers  
R.E. Ginna Nuclear Power Plant  
Docket No. 50-244

Dear Mr. Stahle:

Rochester Gas and Electric wishes to make two clarifications to the proposed Technical Specification change request, as provided in Enclosure 2 to RG&E's July 24, 1987 letter on this subject. These are as a result of a telephone conversation between the NRC reviewer and RG&E on April 29, 1988. The clarifications to paragraph 4.14.1.e, page 4.14-5, are shown on the attached sheet and require that snubbers similar to those which have failed due to manufacturer or design deficiency be functionally tested or evaluated to ensure their operability. The attached page should be substituted for page 4.14-5 submitted with our July 24, 1987 Application.

We hope that this clarification will help to facilitate the processing of this proposed Amendment to the Technical Specifications.

Very truly yours,

  
Bruce A. Snow  
Superintendent  
Nuclear Production
