Subject: Proposed Technical Specification
Safety Related Snubbers
R. E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Zwolinski:

The NRC has under review two proposed Technical Specifications regarding safety related shock suppressors, which were submitted on November 24, 1981 and August 1, 1983. Both were the result of modifications to plant piping systems, principally our piping seismic upgrade program. The former submittal proposed that the listing of safety related hydraulic snubbers be included in the Inservice Inspection Program and, in response to an NRC request, proposed adding mechanical snubbers to the list of snubbers. The latter further updated the list of hydraulic snubbers in the Technical Specifications.

Our letter dated July 20, 1984 provided an updated list of safety related hydraulic snubbers. As a result of our continuing seismic upgrade program that list must now be revised.

The attached list incorporates those changes made since our July 20, 1984 letter:

1. Snubber FW-25 has been replaced with a mechanical snubber FWU-17. Snubber FW-25 has been deleted from the hydraulic snubber list.
2. Snubber AFW-49 has been renumbered and is now designated AFU-109.
3. Snubber FW-83 has been renumbered and is now designated FWU-44.
4. Snubber MS-146 (TOP) and MS-146 (BOTTOM) have been replaced with mechanical snubbers MSU-26. Snubbers MS-146 top and bottom have been deleted from the hydraulic snubber list.

RG&E previously submitted a proposed Technical Specification to incorporate requirements for mechanical snubbers. An up-to-date listing of mechanical snubbers can be submitted when NRC review is nearing completion.

Very truly yours,

Roger W. Kober
