Subject: Submittal of Quality Assurance Program
R. E. Ginna Nuclear Power Plant, Unit Number 1
Docket Number 50-244

Dear Dr. Murley:

Transmitted herewith and in accordance with 50.54 of 10CFR Part 50 is Revision 9 to the Quality Assurance Program for Station Operation. This revision incorporates changes to the corporate organization chart consistent with corporate organizational changes earlier this year. These changes have been previously submitted as a change to Technical Specifications. The entire program is being submitted with reference to Technical Supplement Accompanying Application for a Full-Term Operating License omitted. Since the Quality Assurance Program will be referenced in our updated FSAR, reference to the Technical Supplement is no longer appropriate or necessary. This does not effect the content of the Quality Assurance Program.

These changes do not reduce any of our previous commitments.

Very truly yours,

Roger W. Kober
