Docket No. 50-244

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Provisional Operating License No. DPR-18, hereby requests that the Technical Specifications set forth in Appendix A to that license be amended. This request for a change in the Technical Specifications is submitted to permit a consolidation of management responsibilities for Ginna Station.

The proposed technical specification change is set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility. As demonstrated in Attachment C, the proposed change does not involve a significant hazards consideration. The change involves a single issue which is administrative in nature, the reorganization of the plant staff, and has no safety or environmental significance. Therefore, this change is a Class II Amendment in accordance with

10 CFR 170.22.
