EXTRAS TO NRR ORB5 BC

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the results of its investigation of the activities of the American Friends Service Committee in the Philippines.

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that may be contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that may be contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action. This involves determining the steps that need to be taken to address the problem and the resources that will be required to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the implementation to ensure that the problem is being effectively addressed.

Re: Rochester Gas and Electric Corporation,
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Denton:

Enclosed are:

1. Three (3) originals and nineteen (19) copies of an Application for Amendment to Operating License to amend Appendix A of that license to evaluate additional clarification of the term "operable" and to provide consistency between limiting conditions for operation and the associated action statements;
2. Forty (40) copies of documents designated Attachments A B and C which set forth the requested change in Technical Specifications, its safety evaluation, and the basis for determining that the change does not involve a significant hazards consideration; and
3. A check for \$12,600.00 in payment of the license amendment fee.

Very truly yours,

John E. Maier
