(R. E. Ginna Nuclear Power Plant,)
Unit No. 1))

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Provisional Operating License No. DPR-18, hereby requests that the Technical Specifications set forth in Appendix A to that license be amended. This request for a change in the Technical Specifications is submitted to reflect recent management changes at RG&E and to correct an omission in Amendment No. 58.

The proposed technical specification changes are set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility. As demonstrated in Attachment C, the proposed change does not involve a significant hazards consideration. The change involves a single issue which is administrative in nature, the reorganization of the plant staff, and has no safety or environmental significance. Therefore, this change is a Class II Amendment in accordance with 10 CFR 170.22.
