Director of Nuclear Reactor Regulation
Attention: Mr. Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

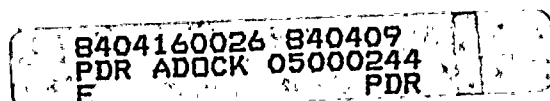

Subject: NUREG 0737, Supplement 1
R. E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Crutchfield:

An RG&E letter dated April 15, 1983 provided the Company's schedule for completing the control room design review required by Supplement 2 to NUREG 0737. In that letter, RG&E committed to provide a Program Plan in October 1983. That date was subsequently revised through discussions with NRC Staff to August 1984. Due to the continuing heavy press of regulatory commitments, RG&E now finds it necessary to delay that submittal until October 1984. Technical difficulties encountered while establishing the operability of other NUREG 0737 required equipment have reduced the resources available to apply to the control room design reviews.

Very truly yours,

Roger W. Kober
