September 24, 1982

Director of Nuclear Reactor Regulation
Attention: Mr. Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Proposed Technical Specification Change
Reduced Pressure and Temperature
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Crutchfield:

By letter dated August 9, 1982 we proposed a Technical Specification to permit operation of Ginna Station at either current primary system pressure and temperature or at reduced pressure and temperature. Since the time of that submittal, we have completed additional analysis and tests on the cost effectiveness of operation at reduced system pressure and temperature. Based on the additional information, we do not intend to operate at reduced system temperature and pressure and, therefore, withdraw our August 9 request for your approval.

Very truly yours,

John E. Maier
