Director of Nuclear Reactor Regulation
Attention: Mr. Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Integrated Leak Rate Test
R. E. Ginna Nuclear Power Plant Unit No. 1
Docket No. 50-244

Dear Mr. Crutchfield:

An integrated leak rate test was performed in May 1982 which demonstrated that leakage from the reactor containment building at the R. E. Ginna Nuclear Power Plant was within the limit specified in our Technical Specifications. Enclosed are fifteen (15) copies of the report of that test titled "Reactor Containment Building Integrated Leak Rate Test". This report is submitted in accordance with the requirements of Appendix J to 10 CFR Part 50 and contains an analysis and interpretation of the Type A test results and a summary analysis of Type B and Type C tests performed since the last Type A test in 1978.

Very truly yours,

John E. Maier
