8. RESEARCH DESIGN - The research design is a plan or blueprint for the study. It outlines the methods and procedures that will be used to collect and analyze data. The design should be clear, concise, and logical, and it should be based on a thorough understanding of the research problem and the available resources.

Re: Rochester Gas and Electric Corporation
R.E. Ginna Nuclear Power Plant
Unit No. 1, Docket No. 50-244

Dear Mr. Denton:

As counsel for Rochester Gas and Electric Corporation, we hereby submit three (3) signed originals and nineteen (19) copies of a document entitled "Application for Amendment to Operating License", together with forty (40) copies of the proposed Technical Specifications designated Attachment A and forty (40) copies of the Safety Analysis designated Attachment B. The Application seeks to amend the Technical Specifications set forth in Appendix A to that license in response to a letter dated September 20, 1982 from Darrel Eisenhut to incorporate NUREG-0737 limitations on plant staff working hours and reporting requirements for safety valve and relief valve failures and challenges.

The proposed changes are in response to a written request from the NRC and are administrative in nature. Accordingly, this amendment is exempt from a fee in accordance with 10 CFR Section 170.22.
