Operating Reactors Branch No. 5
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Supplemental Information
Steam Generator Tube Rupture Incident
R. E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Crutchfield:

On page 4-12 of NUREG-0916, "Safety Evaluation related to the restart of the R. E. Ginna Nuclear Power Plant," the staff indicates that "the licensee has committed to perform a long-term evaluation to determine the criteria which should be provided in the procedures for deciding when to discontinue the use of the main condenser in favor of the atmospheric steam dump." Although we had not, in fact, previously committed to this study, we do agree to provide such a study within six months.

Very truly yours,

John E. Maier
