Director of Nuclear Reactor Regulation
Attention: Mr. Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Unresolved Safety Issues
R. E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Crutchfield:

In your letter dated June 17, 1982, RG&E was requested to furnish status information relative to Unresolved Safety Issues. This information was requested within 60 days, in order to enable the staff to expeditiously review and evaluate the status of these items at Ginna for inclusion in the Full Term Operation License conversion SER.

Based on the present schedule for this SER of mid-October 1982, RG&E is planning to provide the requested information by late September 1982. This should provide the necessary time for incorporation into the SER. Since the subject of this letter addresses the status of industry-generic Unresolved Safety Issues, rather than any plant-specific concerns, there are no short-term safety implications associated with this response delay.

Very truly yours,

John E. Maier
