

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

In the Matter of)

Rochester Gas and Electric Corporation)
(R. E. Ginna Nuclear Power Plant,)
Unit No. 1))

Docket No. 50-244

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Provisional Operating License No. DPR-18, hereby requests that the Technical Specifications set forth in Appendix A to that license be amended to revise the Engineered Safety Feature actuation system instrumentation trip setpoint for high containment pressure. This request for a change in Technical Specifications is submitted as a result of a review of containment isolation dependability in accordance with TMI Action Plan Requirements (NUREG-0737).

The proposed technical specification change is set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation also demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluents or any change in the authorized power level of the facility. The change involves a single safety issue, high containment pressure setpoint, and is in accordance with a clearly identified NRC Position. The proposed setpoint was previously reviewed and

PDR

approved by the NRC Staff in a Safety Evaluation Report. This application formally requests amendment to the Technical Specifications as previously approved. Therefore, this change requires no payment of fee.

WHEREFORE, Applicant respectfully requests that Appendix A to Provisional Operating License No. DPR-18 be amended in the form attached hereto as Attachment A.
