The first of these is the fact that the
 government has been unable to raise the
 necessary funds to meet its obligations.
 This is due to a number of factors, including
 the fact that the government has been unable to
 collect the necessary taxes, and the fact that
 the government has been unable to borrow the
 necessary funds from the international market.
 The second factor is the fact that the
 government has been unable to control the
 inflation rate, which has led to a sharp
 increase in the price level. This has led to
 a loss of confidence in the government, and
 has led to a sharp decline in the value of
 the national currency.

The third factor is the fact that the
 government has been unable to control the
 balance of payments, which has led to a
 sharp decline in the value of the national
 currency. This has led to a loss of confidence
 in the government, and has led to a sharp
 decline in the value of the national currency.

Attention: Mr. Dennis M. Crutchfield, Chief
Operating Reactors Branch No. 5
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: NRR/Licensee Integrated Assessment Meeting
R. E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Crutchfield:

This letter is in response to your letter, received by telecopy on March 9, 1982, discussing the plans for the Ginna Integrated Assessment meeting of March 10-12, 1982. In the "purpose of meeting" section, it is stated that this will "...allow the licensee to present final arguments or present new information or differences...". RG&E disagrees that this meeting is the time for final arguments for many of the SEP topics. There are a significant number of topics for which RG&E is still reviewing the NRC's recent draft SERs (e.g., III-3.C, V-5), or for which the NRC has not responded to RG&E's draft SER comments (e.g., II-3.B, III-7.A, III-7.B, VI-4, VI-7.B). Further, the delay of SEP topics III-2 and III-4.A could modify the final RG&E proposals for other completed SEP topics, such as III-6, Seismic Considerations. Thus, the purpose of the meeting should be only to discuss all defined open items, excepting "natural phenomena" topics. Further RG&E review and comment on recently completed or soon-to-be completed topics should not be precluded. It is expected that a number of "open" SEP topics will be determined to be acceptably resolved, once the NRC completes its review of RG&E information.

RG&E is also not prepared to provide a detailed cost/benefit analysis, or personnel exposure estimates, resulting from possible corrective actions. Based on previous discussion with members of the NRC Staff, it was our understanding that this information would not be required at this time. Estimates of cost-benefit and personnel exposure will be factored into the final backfitting decisions, to be decided at the end of the Integrated Assessment.

Very truly yours,

John E. Maier
