Attention: Mr. T. E. Murley, Director

Re: Reportable Event,
Chilled Water System

Dear Mr. Murley:

This is a follow-up to my letter of October 30, 1990 which described a Reportable Event under the provisions of 10CFR21 related to the V. C. Summer Nuclear Station (50-395). In that letter it was mentioned that the evaluation of the other nuclear power plants, for which G/C was the A/E of record, had not been completed. We have now completed our review of three of these four plants: Three Mile Island Unit 1, Crystal River Unit 3, and the Ginna Station. We have concluded that this situation does not exist for these three plants.

Plant specific evaluation of the safety-related chilled water system at the Perry Nuclear Power Plant, Unit 1 (50-440) is still in progress. The Cleveland Electric Illuminating Company has been notified of this event and is providing us with additional information to complete our evaluation. We will complete our evaluation and advise you of the results by December 30, 1990.

If you require any further information, please call me at (215) 775-2600, extension 7543.

Very truly yours,

William F. Sailer
Senior Vice President
