Subject: Generic Letter 90-06
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Johnson:

In the course of reviewing Generic Letter 90-06, it was determined that, potentially, extensive changes to the Ginna Station Technical Specifications could be required. Although GL 90-06 does not require that the actual License Amendment be submitted with the response, it does request that a commitment to certain Technical Specification changes be made. Because of the complexity of these potential changes, RG&E has determined that our Plant Operating Review Committee (PORC) and our Nuclear Safety and Audit Review Board (NSARB) should formally endorse our response. This will delay our submittal date. We expect that a response to Generic Letter 90-06, including commitments to certain Technical Specification changes, will be provided by March 15, 1991.

Very truly yours,

Robert C. Mecredy
