In the Matter of)
)
Rochester Gas and Electric Corporation) Docket No. 50-244
(R.E. Ginna Nuclear Power Plant))
)

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Facility Operating License No. DPR-18, hereby requests that the Technical Specifications set forth in Appendix A to that license be amended. This request will revise Technical Specification 5.1 and Figure 5.1-1, in order to describe, rather than depict, the site area boundary. This proposed change should be considered administrative in nature, since it maintains the Ginna Station Technical Specifications consistent with 10CFR50.36(c)(4), in that it depicts the Exclusion Area Boundary (Unrestricted Area Boundary) and also has no effect on the RG&E Security or Emergency Plan.

The proposed Technical Specification change is set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation also demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluent or any change in the authorized power level of the facility. As demonstrated in Attachment B, the proposed change does not involve a significant hazards consideration.
