NUCLEAR REGULATORY COMMISSION

In the Matter of )  
 )  
Rochester Gas and Electric Corporation ) Docket No. 50-244  
(R. E. Ginna Nuclear Power Plant )  
 )

APPLICATION FOR AMENDMENT  
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the U.S. Nuclear Regulatory Commission (the "Commission"), Rochester Gas and Electric Corporation ("RG&E"), holder of Facility Operating License No. DPR-18, hereby requests that the Technical Specifications set forth in Appendix A to that license be amended. This request for change in Technical Specifications is submitted to revise Ginna Technical Specifications 6.9.1.2 and 6.9.2.5. By 51FR40303 the commission amended 10CFR50.4 which establishes procedures for submitting written communication by licensees. This rule authorized pen-and-ink changes to licensees' technical specifications. Although the Commission does not expect formal applications for amendments, this application is submitted for the purpose of maintaining document traceability.

The proposed Technical Specification change is set forth in Attachment A to this Application. A safety evaluation is set forth in Attachment B. This evaluation also demonstrates that the proposed change does not involve a significant change in the types or a significant increase in the amounts of effluent or any change in the authorized power level of the facility. As demonstrated in Attachment B, the proposed change does not involve a significant

hazards consideration.

WHEREFORE, Applicant respectfully requests that Appendix A to Facility Operating License No DPR-18 be amended in the form attached hereto as Attachment A.
