Subject: Rochester Gas and Electric Corporation
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Dear Mr. Johnson:

Enclosed is an Application for Amendment to Operating License to amend Appendix A of that license to revise Technical Specification Surveillance Requirement 4.3.1 pursuant to guidance provided in Generic Letter (GL) 91-01, "Removal of the Schedule for the Withdrawal of Reactor Vessel Material Specimens From Technical Specifications", dated January 4, 1991. Further, Technical Specification 4.3.1.2 will be deleted since this specification is implicitly described in the proposed Specification 4.3.1.1.

Removal of the schedule for withdrawal of reactor vessel material specimens from Technical Specifications is considered a line item Technical Specification improvement. The proposed amendment is consistent with the recommendations of the Commission Policy Statement on Technical Specification Improvements.

Rochester Gas and Electric (RG&E) shall maintain the Commission's approved version of the specimen withdrawal schedule in the Updated Final Safety Analysis Report (UFSAR). The addition of this schedule will be in the next revision of the UFSAR in accordance to 10CFR50.71(e).

This proposed amendment should be considered effective 30 days after RG&E receipt of NRC approval.

Very truly yours,

Robert E. Smith
