Subject: License Amendment Request, Reactor Coolant System Vents  
Rochester Gas & Electric Corporation  
R.E. Ginna Nuclear Power Plant  
Docket No. 50-244

- References: (a) Letter from R.C. Mecredy, RG&E, to A.R. Johnson, NRC, Subject:  
*License Amendment Application Requests*, dated April 26, 1995.
- (b) Letter from R.C. Mecredy, RG&E, to A.R. Johnson, NRC, Subject:  
*Application for Amendment to Operating License to Implement GL 90-06*,  
dated September 15, 1992.

Dear Mr. Johnson,

By Reference (a), RG&E withdrew several proposed license amendments in anticipation of submitting a conversion to the Improved Technical Specifications as documented in NUREG-1431. Included with the withdrawn license amendments were changes related to the Reactor Coolant System vents (Reference b) identified as Reference b in the April 26, 1995 letter. The purpose of this letter is to rescind the withdrawal of the Reactor Coolant System vent proposed license amendment changes. As such, RG&E requests NRC review and approval of the proposed technical specifications as documented in the September 15, 1992 letter. This process should be coordinated to support the NRC review of the improved technical specifications for Ginna Station.

Very truly yours,

  
Robert C. Mecredy
