Subject: Application for Amendment to Facility Operating License
DPR-18 Part 2, Section B and Technical Specification
Section 5.4
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Ref. (a): RG&E Letter from R.C. Mecredy, (RG&E), to A.R. Johnson,
(NRC), Subject: Technical Specification Improvement
Program, dated May 5, 1995.

(b): NRC Letter from A.R. Johnson, (NRC), to R.C. Mecredy
(RG&E), Subject: Safety Evaluation of Rochester Gas and
Electric's Proposed Criticality Analysis of the Ginna New
and Spent Fuel Rack/Consolidated Rod Storage Canisters,
dated August 30, 1995.

Dear Mr. Johnson:

Enclosed is an application for Amendment to the Facility Operating
License and to amend Appendix A of that license to reflect changes
related to the nuclear fuel cycle for NRC approval.

Request for review of this application is made in accordance with
the provisions of 10 CFR 50.91(a)(6) for exigent circumstances.
Current Technical Specification 5.4.2 limits the fuel enrichment of
U-235 to be stored in the Spent Fuel Pool to 41.9 grams per axial
centimeter. Fuel being delivered to the Ginna site approximately
February 17 will contain a high enrichment, in order to support the
18-month fuel cycle. Therefore, this amendment must be approved
prior to that date.

Very truly yours,

Robert C. Mecredy
