Subject: Response to NRC Generic Letter 96-01, dated January 10, 1996, Testing of Safety-Related Logic Circuits
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

References: (a) Letter from Bruce A. Boger NRC, to Alexander Marion, NEI, Subject: Generic Letter 96-01, dated February 14, 1996

Dear Mr. Johnson:

Generic Letter 96-01 requested within 60 days a response indicating whether or not addressees would implement the requested actions of the generic letter. An industry-wide extension to the 60-day response date was provided in Reference (a), to a date 30 days following a March 19, 1996 NRC/industry workshop or April 18, 1996.

RG&E will comply with Requested Actions (1) and (2) of Generic Letter 96-01. Our review of logic circuits for safety-related systems and components and any subsequent modifications to surveillance procedures necessary for complete testing to comply with technical specifications will be completed prior to startup from the planned November 1997 refueling outage, representing the first refueling outage commencing one year after the issuance of the generic letter.

Very Truly Yours,

240005

Robert C. Mecredy

Subscribed and sworn to before me
on this 18th day of April, 1996
