Subject: WCAP-14333P, Response to Request for Additional Information (TAC No. M92782)
Rochester Gas & Electric Corporation
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Reference: (a) Letter from G.S. Vissing, NRC, to R.C. Mecredy, RG&E, Subject: *Westinghouse Owners Group - Request for Additional Information on WCAP-14333P, "Probabilistic Risk Analysis of the RPS and ESFAS Test Times and Completions"* (TAC No. M92782), dated June 28, 1996.

Dear Mr. Johnson,

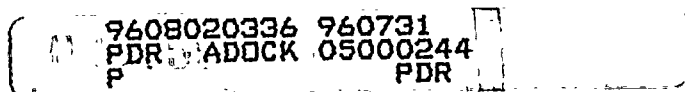

By Reference (a), the NRC forwarded a request for additional information (RAI) related to the NRC review of WCAP-14333P since Ginna Station was the lead plant for implementation of this report. The RAI requested that RG&E respond within 30 days of receipt of the letter with a schedule for responding to the RAI. The purpose of this letter is to provide the requested schedule.

Following discussions with the Westinghouse Owners Group (WOG), the intended schedule for response to the RAI is by November 29, 1996. Since the questions documented in the RAI are generic (i.e., do not apply to Ginna Station specifically), the response will be provided by the WOG. Ginna Station is the lead plant for this generic program. As such, all future correspondence that is related to generic approval of WCAP-14333P should be directed to Mr. Tom Greene, WOG Chairman with a copy to RG&E. All correspondence that relates to Ginna Station's implementation of this WCAP should be directed to RG&E. If you have any further questions, please contact George Wrobel, Manager of Nuclear Safety and Licensing, at (716) 724-8070.

Very truly yours,

Thomas H. Marklew for
Robert C. Mecredy
