Subject: Ginna Station IPE/IPEEE
R.E. Ginna Nuclear Power Plant
Docket No. 50-244

Ref.(a): Letter from R.C. Mecredy, (RG&E) to Guy S. Vissing, (NRC), "Generic Letter 88-20, Level 1 Probabilistic Safety Assessment (PSA)", dated January 15, 1997.

(b): Letter from A.R. Johnson, (NRC), to R.C. Mecredy, (RG&E), "Ginna Probabilistic Risk Assessment Project Report of March 15, 1994, to the NRC in Response to Generic Letter 88-20; Request for Additional Information (TAC No. M74414), dated April 19, 1996.

Dear Mr. Vissing:

By Reference (a), RG&E submitted an updated Level 1 Probabilistic Safety Assessment (PSA) and a response to the Reference (b) request for additional information (RAI). In Reference (a), RG&E also updated our schedule for completion and submittal of the updated Level 2 and flooding portions of the PSA, and the internal fire analysis requested by Supplement 4 of GL 88-20.

We have made substantial progress in the completion of our Level 2 PSA analysis, but final quantification of results has not been completed. Our current estimated submittal date of the Level 2 PSA to the NRC, including all commitments made in Reference (a), is now August 30, 1997.

We have also had extensive dialogue with our PSA contract organization to develop the schedule for fire and flood assessments. Based on our most recent discussions, and consistent with previous industry experience, we estimate that these efforts will be submitted to the NRC by June 30, 1998.
