

Comments to Dresden Exam Outline Submittal

1. SRO Admin JPM, Equipment Control: What is ACPS?
Response: ACPS \equiv Abnormal component positioning sheet.
2. In-plant JPMS: Can these JPMS be written such they can be performed on either units?
With 3 examiners in the field with 3 examinees, performing these JPMS in the other unit may prevent running into each other inadvertently. Or may do without 3rd examiner on 2nd Tuesday.
Response: Licensee will evaluate the possibility of writing in-plant JPMS for either unit. Later determined due to class size, unnecessary to write in-plant JPMS for both units.
3. Scenario #1, Event 4: Are there sufficient panel actions for the BOP for this event?
Response: There should be sufficient panel actions to evaluate.
4. I need to see the audit exam outlines to ensure minimal overlap between exams.
Response: Audit Exam outlines will be provided for review.
5. Schedule exit debrief for 2nd Tuesday PM?
