U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: QUALIFICATION OF SAFETY-RELATED ELECTRICAL
EQUIPMENT

Reference: Letter dated February 21, 1980, D. F. Ross, Jr., to
Operating License Applicants, same subject

Dear Mr. Eisenhut:

The reference letter requested our schedule for completing a review of equipment qualification documents for safety-related electrical equipment. The purpose of this review should be to identify the degree to which our qualification meets with the staff's position described in NUREG-0588. Mr. Ross's letter also indicated that the staff expected to resolve comments on NUREG-0588 and issue the staff position in effective form by April 1980.

We are commenting in a separate letter on the draft of NUREG-0588. The acceptance of our comments by the staff would hopefully result in significant changes to some of the requirements in NUREG-0588. A schedule for completion of our review will be provided following final issuance of NUREG-0588.

Should you have any questions with regard to our response, please notify me.

Very truly yours,

D. L. Renberger
